

AIM Harvest Summary - Week of 7/30/12

Crew Leader: Nathan Shea

Divers: Kevin Peterson & Luke Dumas

40Hrs

7/30

Removed 50 plants near 4 of Guy's buoys from the southeast portion of the southern basin, 55 plants from the center, and 15 plants from the south eastern portion (3 of Guy's buoys) of the southern basin. Removed 35 plants from elongated cove northeast of Indian Carry (1 Buoy). Removed 1 plant near 1 buoy off southern point of Corey's Island. Removed 3 plants (1 Buoy) from south west corner of bay south of Bull Point, and a additional 10 plants from small eastern bass weed patch. . Removed 120 plants from south Pelky bay near 6 buoys and 70 plants from the mid Pelky bass weed patch (1buoy).

7/31

Removed 6 plants from 1 buoy located in southwestern Narrows. Removed 90 plants from Eagle island, most plants were removed from the northwest bass weed patch, an additional small patch was found near the southwest corner, also a handful of plants were found along southern shoreline. (8 buoys- 2 in northwest, 4 in west, 2 in south). Removed 1 plant from 1 buoy along the east central Narrows shoreline. Removed 1 bag of plants from Pork Bay, all located in the raised bass weed bed in the central mouth of the bay.

8/1

Removed 50 plants from small cove just south of Pork Bay (4 buoys). Removed 65 plants from the southern shoreline of Pork Bay. Removed 90 plants from bass weed patch off shore from Donaldson's. Removed 1 plant from 1 buoy in Back Bay. Removed 75 mature plants from 1 buoy in the central area of the northern basin. Removed 55 mature plants from area near channel east of Buck Island.

8/2

Removed 1 bag of plants from area between the eastern shore of Buck Island and the channel markers, and 55 plants from western shoreline in between 2 buoys. Removed 25 plants from bay just south of eastern Narrows.

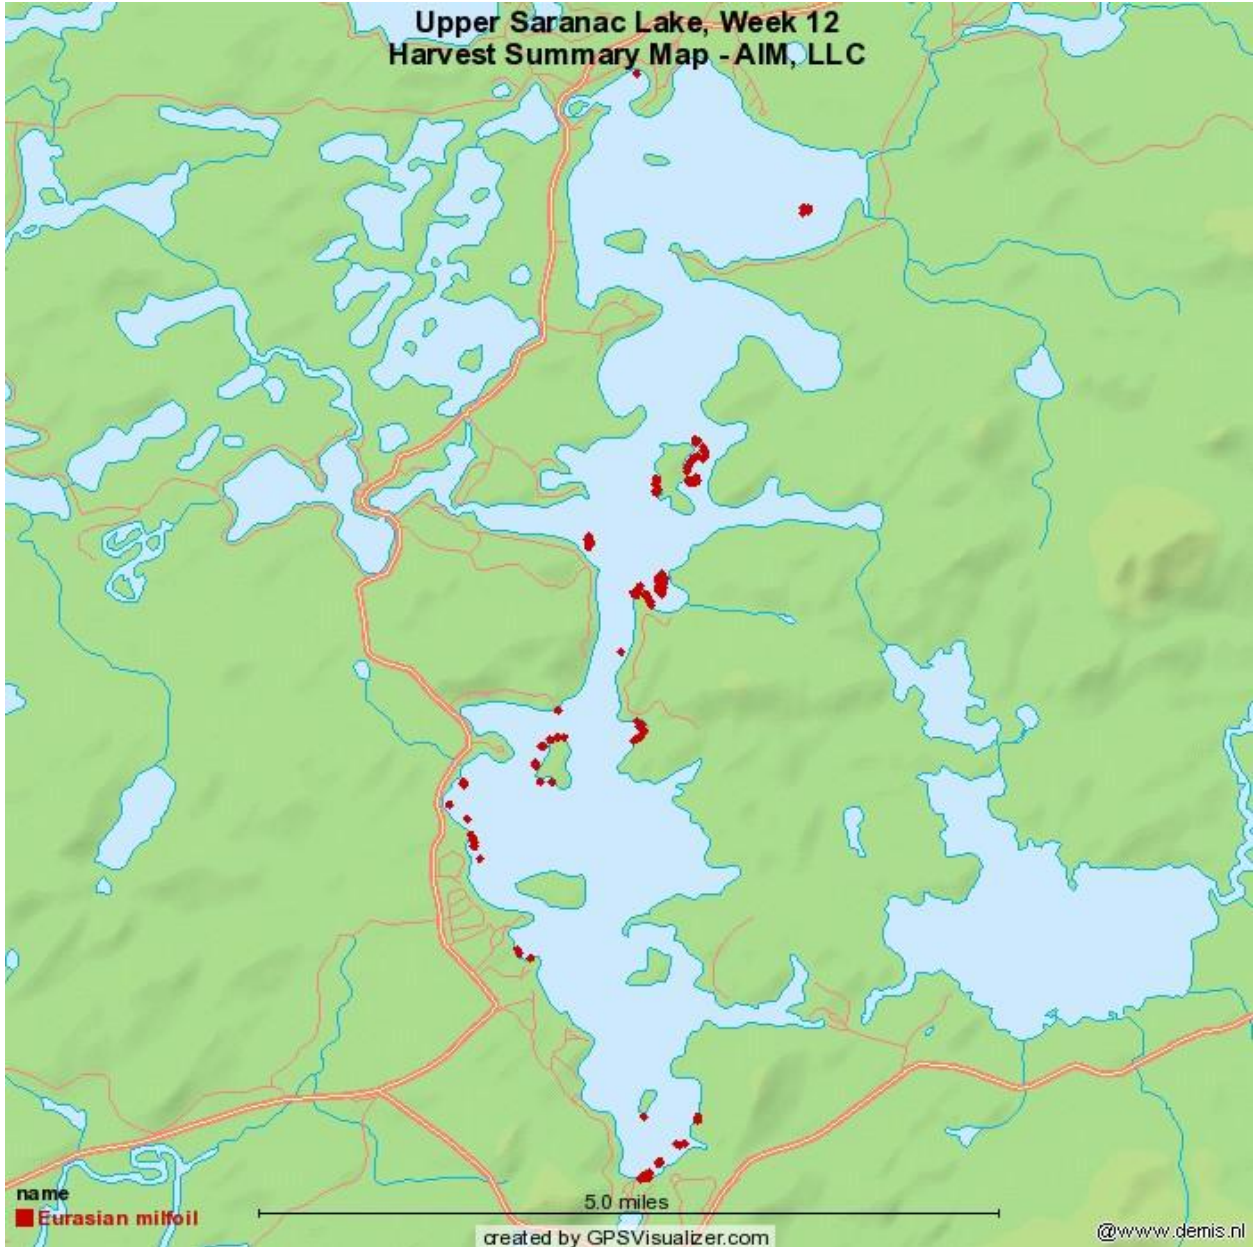

Nearly all plants removed were large, tall mature plants with the exception of Pork bay and the bay south of eastern Narrows.

I strongly recommend that the bass weed patch near Donaldson's is re surveyed very soon, due to the large area and the abundance and age of the plants we removed this week.

Unless otherwise indicated all "plants removed" refers to Eurasian milfoil

Total Invasive plants removed: 4 bags 100 lbs

Upper Saranac Lake, Week 12
