

Week of 8/20/12

Crew Leader: Nathan Shea

Divers: Doug Russo & Chris Critteli

40Hrs

Removed 250 plants from Dr. Island, primarily from area near small cove off mainland just south of Dr. Island and bassweed patch just east of the island. Removed 3 plants from 2 of Guy's buoys in the northern basin (north central). Saginaw Bay - Removed 120 plants from area between small north central cove and the small north central island. Removed an additional 15 plants from 1 of Guy's buoys near the northeast of the bay, removed 30 plants from the southeastern portion of the bay to the south central part of the bay (prior to the three buoy hazard area on the south central shoreline).

Removed 255 plants from Saginaw Bay, between the south central buoy hazards and the southwest outlet. Several small patches were found along the shoreline, 1 near the 3 hazard buoys mentioned above, 1 just west of the southwest hazard buoys and the third was in the middle of these two near a small piece of shoreline cliff face. Removed 55 plants from the hazard area just east of Wind Island near 1 of Guy's buoys. Removed 60 plants from southeast Pork Bay near 3 buoys and 40 plants from the southern shoreline, 1 buoy in this area. Removed 1 plant from 1 buoy in the center of this bay. Removed 2 plants from 1 buoy near south Buck Island. Removed 2 plants from 1 buoy in the southeast Narrows. Removed 1 plant from the "Boot".

Removed 90 plants from North Gull. Removed 4 plants from small bay south of Bull point. Removed 4 plants from 2 buoys along shoreline south of this bay and north of Camp Wenonah Bay. Removed 100 plants from Camp Wenonah Bay near 7 buoys.

Removed 90 plants from small bassweed patch between judge Allen's home and Deer Island. Removed an additional 50 plants from Camp Wenonah Bay. Removed 20 plants from 2 buoys near Panther point. Removed 40 plants from area near 8 buoys in the southwest and south central southern basin. Removed 150 plants from small patch near 4 buoys in the south central southern basin near large rock at the opening of a small wetland. Removed 5 plants from the southeast of the basin. Removed 55 plants from elongated cove east of Corey Island. Removed 2 plants from 1 buoy located near shore on the northern tip of Corey Island

Plants varied in age and size. Plants were predominantly tall single stem plants, however a good amount near the shoreline in Saginaw were short multi stem plants.

Total Invasive plants removed: 4.5 bags

112.5 pounds

Week 15 Harvest Map
