

**AIM Harvest Summary:      Week of 6/25**

**Dive Leaders:              Kyle Jaquis**

Crew Leader: Kyle Jaquis  
Divers: Eric Stender, Kyle Roddy

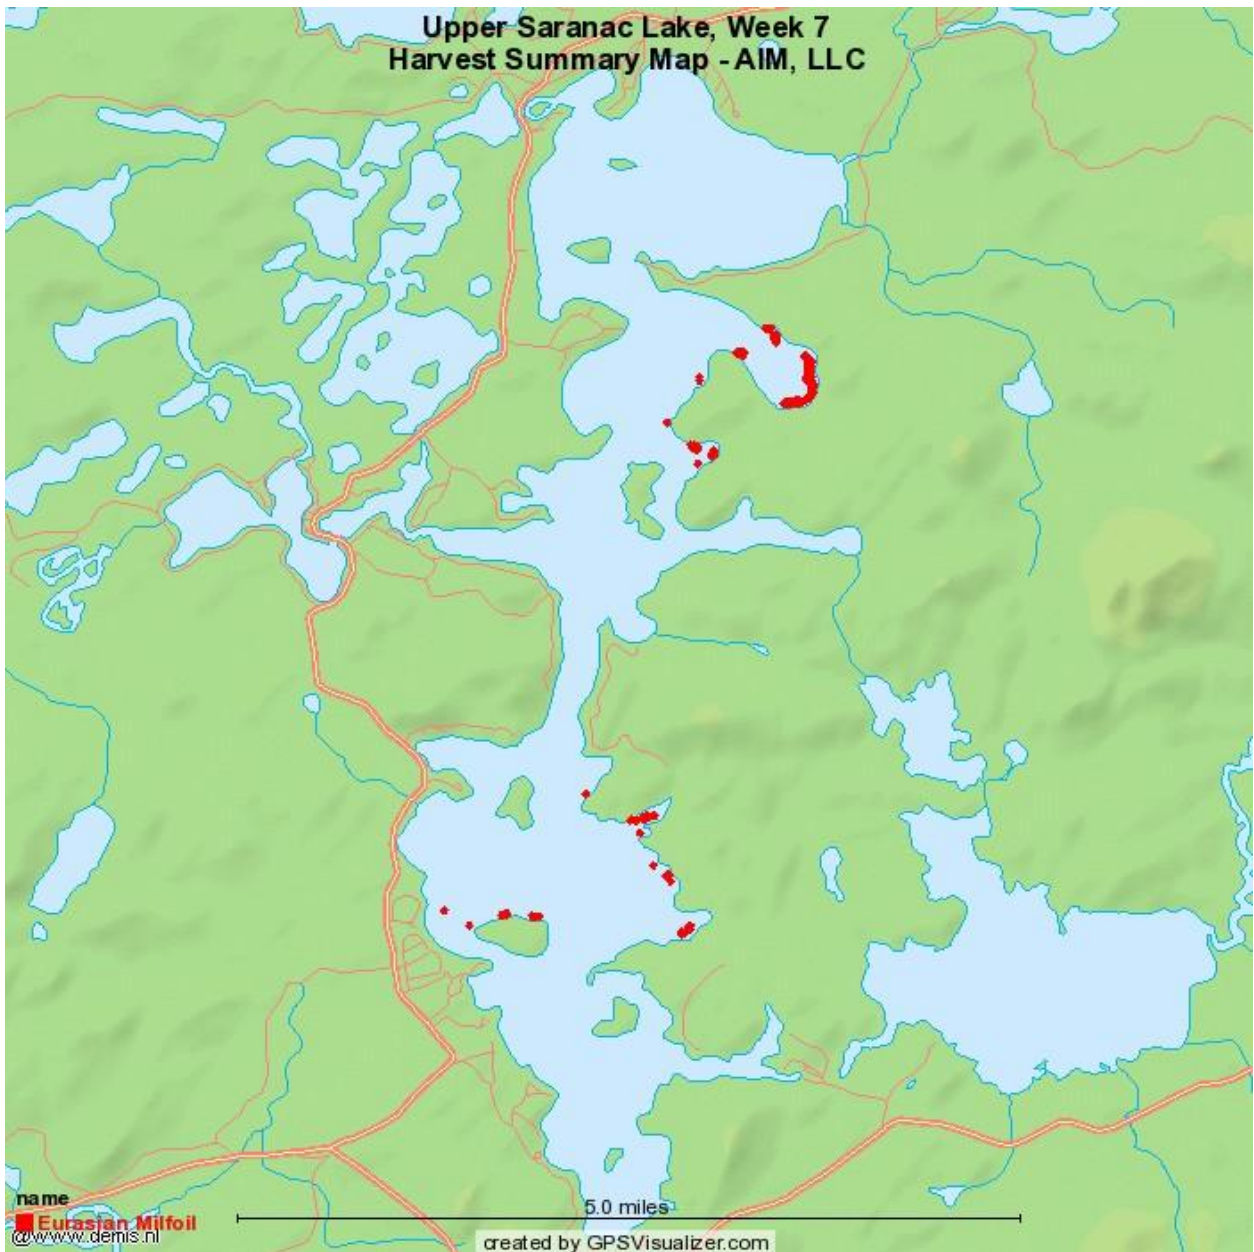

The crew swam the circumference of Deer Island, finding 20 plants mostly on the North shore and off the Western point. They then swam Gull Point finding 1 plant and into North Gull Bay where 41 plants were removed. The shore between North and South Gull Bays yielded 55 plants and South Gull Bay had 60 plants mostly in the center of the bay. All of the above locations produced a combined total of ½ bag.

The crew then proceeded to Big Square Bay starting on the North shore. The crew line-swam the entire littoral heading around the Bay to the point on the Southern shore. The entire bay yielded 1 ½ bags.

The team then swam from Big Square South to the Buck Island channel where a patch was found and harvested in the small bay Northeast of the Buck Island channel. Patch yielded 1 ½ bags.

**Total Invasive plants removed: 3.5 bags**
