

## **AIM Harvest Summary:**

**Week of 7/2/12**

Crew Leader: Nathan Shea

Divers: Eric Stender, Kevin Peterson

40Hrs

Removed 50 plants from the southeastern part of South Bay, around and near 11 of Guy's buoys. Removed 20 plants from the northern section of the channel between Birch Island and the mainland, near 5 buoy's. Removed 35 plants from the eastern cove on Buck Island near 6 buoys. Removed 125 plants from the larger cove in the northeast part of the channel between Buck and the mainland.

Removed 180 plants from the channel between Buck Island and the mainland, near large rocks on the side of the channel. Removed 315 plants from the northeast cove surveyed the previous day in (in between Buck and cut into mainland). Removed 45 plants from the southeastern shoreline of the cove and 25 plants from the northern point of this cove. Removed 125 plants from bassweed patch off northeast tip of Buck Island, near 1 of Guy's buoys. Removed 7 plants from the inner shoreline of Green Bay and 10 plants from the southwestern beginning of College Row, near 2 of Guys buoys.

Removed 45 plants from the small cove just north of Pork Bay. Removed 45 plants from the central opening of Pork Bay. Removed 20 plants from South Gull. Due to ominous weather and potential of lightning we left this bay before completion and finished the day in the cove just north of Judge Allen's house, where we removed 25 plants.

Removed 5 plants from bassweed patch off northeast Deer Island and 1 plant from northwest point of Deer. Removed 3 plants from in front of Wawbeek. Removed 15 plants from smaller bay to the south of the point located directly to the southwest of Deer Island. Removed 40 plants from the shoreline to the west of Deer Island. Returned to the small cove north of Judge Allen's home and removed 30 plants.

Many plants were tall single stem plants as well as many young recently established plants. Plants found near Buck Island were generally older multiple stem plants.

**Total Invasive plants removed: 1.5 bags**
