**Brant Lake Milfoil Project: Weekly Summary, week of 7/30**

---

Crew Leader: Kyle Jaquis  
Divers: Chris Critelli, Eric Stender  
40Hrs

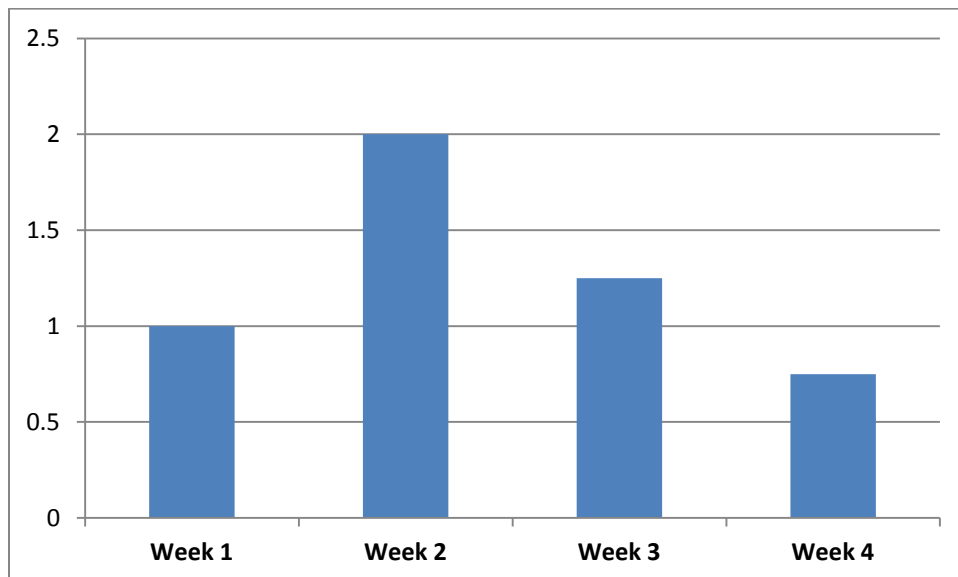

The crew started at Point O Pines and worked North through Sunset Cove to the small island on the Northeast shore. This swim resulted in only 33 harvested plants all of which were young, new growth. Resuming from the small island the crew continued North covering the entire North end and finishing in Big Rock Cove. This swim resulted in 38 harvested plants all small new growth. Resumed the swim from the island just North of Big Rock Cove finding 16 plants at the Northern tip of the island. Continued swimming Big Rock and found another 29 plants along the West shore. The crew resumed its progress south through the chain of small islands across from Point o Pines, down to the channel to the boat launch then back up the East shore to the bay South of Point o Pines. This entire swim resulted in 25 harvested plants.

Unless otherwise indicated all “plants removed” refers to Eurasian milfoil

**Total Invasive plants removed in week 4: 0.75 bags 18.75 lbs**

**Bag Count by Week in 2012**
